Summary

Software Developer with experience in building scalable full-stack applications and AI-driven systems. Proficient in Python, JavaScript, and cloud technologies with hands-on experience in REST APIs, automation, and data processing. Seeking Software Engineer roles starting May 2026.

Experience

AI Implementation Intern - University of Cincinnati **Feb 2025 – Apr 2026**

- *Built AI-powered automation features using OpenAI APIs, improving workflow efficiency and reducing manual intervention*
- *Designed and implemented backend services in Python for large-scale data processing and automation pipelines*
- *Developed and deployed LLM-based applications for internal use cases, enhancing productivity across workflows*

SDE Intern – Instyn Education LLC **Mar 2023 - Apr 2024**

- *Developed Python automation tools that reduced manual reporting effort by ~30% and improved data accuracy*
- *Built scalable data pipelines for analytics and reporting, enabling faster insights generation*
- *Integrated AI models into existing systems to enhance performance and decision-making workflows*

Technical Lead – TEAM/Malla Reddy University **Nov 2021 - Apr 2024**

- *Led a team of developers to design and deliver software projects, ensuring timely execution and quality delivery*
- *Coordinated development tasks, improving team productivity and project efficiency*
- *Mentored junior developers and enforced best practices in coding and system design*

Education

University of Cincinnati **Aug 2024 - Apr 2026**

Master's in computer science.

Malla Reddy Engineering College **Aug 2020 - June 2024**

Bachelor's in computer science (AI & ML)

Projects

Employee Verification platform — *Full-Stack*

- Developed a full-stack platform with role-based authentication (employee & employer) for secure identity verification.
- Built REST APIs to handle authentication, profile management, and verification workflows.
- Designed responsive UI components and scalable backend architecture for real-time user interactions.

Traffic Analytics System — *Python, Computer Vision (YOLO V8)*

- Built a real-time traffic monitoring system using YOLOv8 for object detection and density analysis
- Processed live video streams to extract insights on traffic flow and congestion patterns.
- Enabled automated data collection for analysis and visualization.

Text-to-Visual Presentation Generation System — *Python, OpenAI API's (GPT-3.5 Turbo, Davinci-002), Azure*

- Developed a system to convert PDF text into PowerPoint presentations with AI-generated voiceovers.
- Integrated prompt-driven customization using structured Excel inputs.
- Leveraged Azure services for speech synthesis and automated slide generation.
- Developed Python scripts to seamlessly integrate all components.

Skills

Languages: Python, C, JavaScript, Typescript, HTML/CSS
Frameworks & Libraries: React, Node.js, Express.js, Streamlit, Plotly
Tools & Platforms: Git, GitHub, Azure, Vercel, MongoDB, MySQL, Chrome Extension APIs
AI & Cloud: OpenAI APIs, Azure OpenAI, LLM Applications, Automation Pipelines

Certifications

- Microsoft Certified Python
- Microsoft Certified Azure Fundamentals
